

YOGITA MITTAL

AI Integration & Full-Stack Engineer

yogitamittal.tech@gmail.com | +91 836 049 2810 | <https://tinyurl.com/YogiFolio> | <https://linkedin.com/in/yogitamittaltech> | <https://github.com/yogitamittal93>

PROFILE SUMMARY

Results-driven AI Integration and Full-Stack Engineer with **10+ years** of experience building scalable web platforms and integrating generative AI solutions for global brands. Expert in leveraging **Next.js, React, and Python (FastAPI)** to build modern, secure, and performant applications. Proven ability to own projects from architecture to deployment, specializing in **RAG workflows, chat automation, microservices (Docker)**, and optimizing application performance (SEO, speed, conversion). Seeking to apply deep full-stack knowledge to complex AI application challenges.

CORE SKILLS

Category	Skills
AI & Automation	OpenAI API Integration, Basic RAG Workflows, Automated Chat/Content Generation, Data Visualization, Marketing Automation
Frontend	React 19, Next.js 14 (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3
Backend	Python (FastAPI basics), Node.js, Core PHP, Laravel, REST API Design & Integration
DevOps & DB	Docker, AWS, GitHub Actions, CI/CD Pipelines, PostgreSQL, MySQL
Optimization	Web Performance Optimization (WPO), SEO & ADA Compliance (WCAG), JWT/OAuth 2.0 Security

PROFESSIONAL EXPERIENCE

1. **Freelance AI/Full-Stack Developer** (Remote) | Feb 2022 – Present

- Designed and implemented **5+ custom full-stack solutions** for SaaS and marketing clients using Next.js, React, Tailwind CSS, and Python/Node back-ends.
- Integrated **OpenAI API** to develop **automated chat and content generation systems**, reducing client manual effort by an estimated **30%**.
- Built and deployed **microservices projects** in Dockerized environments using

PostgreSQL, ensuring modularity and scalability for future AI feature expansion.

- **Optimized CI/CD pipelines** (GitHub Actions + AWS), **automating deployment and testing** cycles to achieve 99.9% uptime for client applications.

2. Marketing Developer - Measured (Texas, US - Remote) | Oct 2023 – Nov 2024

- Engineered and optimized multi-site marketing and analytics systems using Next.js and React, handling high-traffic components for global campaigns.
- **Reduced site speed from 3.5 seconds to 0.7 seconds (a 70% improvement)** by restructuring metadata, implementing CDN strategies, and optimizing caching layers.
- **Drove a 25% improvement in lead conversion** by integrating advanced tracking tools (Ahrefs, Clearbit, HubSpot, Google Tag Manager) and marketing automation APIs.
- Developed dynamic page components (Events, Resources) with server-side pagination and real-time content updates, resulting in higher user engagement metrics.

3. Software Developer - Gardens Alive! (Lawrenceburg, US) | Jul 2012 – Feb 2022

- Developed, scaled, and maintained a portfolio of **15+ brand eCommerce websites** using PHP, Laravel, and MySQL.
- **Migrated legacy codebases to a modular architecture**, leading to a measurable **40% improvement in average page load times**.
- Integrated personalized email automation flows and marketing APIs that **increased conversion rates by 20%** across the brand portfolio.
- Led cross-functional initiatives to improve UX and accessibility, achieving **over 95% compliance with WCAG 2.1 AA** standards across all public sites.

SELECTED PROJECTS

Ideaboard App - Full-Stack Microservices Project

- Built a highly available, **Dockerized microservices application** (Next.js + Node + PostgreSQL) using an API Gateway architecture.
- Documented deployment strategies (Vercel/Render) and scaling decisions, demonstrating full-cycle ownership of a complex system.

Next.js website with Category & Brand Pages (lakshmiironcompany.in)

- Created a modular system for multi-brand product mapping and visual sub-categories to enhance content discovery.
- Implemented Supabase-powered review functionality and a "Get Quote" CTA for real-time user engagement and lead capture.

EDUCATION & CERTIFICATIONS

- **Bachelors in Computer Applications** - Sikkim Manipal University
- **University of Michigan (Coursera):** Python for Everybody Specialization (2025)
- **FreeCodeCamp:** JavaScript Algorithms & Data Structures (2024)
- **LinkedIn Learning:** Git & GitHub for Developers
