Summary

Senior Fullstack Engineer with 13+ years of experience building large-scale, production-grade web applications using PHP, JavaScript, and relational databases. Strong background in backend-heavy systems with deep experience in Smarty PHP templating, MySQL-driven architectures, and high-traffic e-commerce platforms.

Proven ability to design scalable systems, optimize database performance, and deliver reliable user-facing applications. Experienced in working across distributed systems, collaborating with cross-functional teams, and owning features end-to-end from design to deployment.

Core Skills

Backend: PHP (Smarty), MVC Architecture, REST APIs

Frontend: JavaScript, React, Next.js, HTML5, CSS3

Databases: MySQL, PostgreSQL (schema design, query optimization)

Architecture: Distributed Systems, Modular Design, API-driven Systems

Performance: Query Optimization, Caching Strategies, Load Optimization

DevOps: Docker, CI/CD, AWS (basic)

Quality: Testing (unit/integration concepts), Debugging, Cross-browser Compatibility, Accessibility (WCAG, ARIA)

Workflow: Agile, Code Reviews, Mentorship, Cross-functional Collaboration

Professional Experience

Marketing Web Developer – Measured

Oct 2023 – Nov 2024

- Owned fullstack development of marketing web applications, integrating frontend performance with backend data flows.
- Reduced load time from 3.5s to 0.7s through optimized rendering, API usage, and asset strategies.
- Improved SEO score from 78% to 98% via structured data, semantic HTML, and optimized architecture.
- Improved accessibility through semantic markup, ARIA roles, and contrast improvements.
- Built reusable component systems and modular architecture for scalable development.
- Collaborated with product, analytics, and design teams to translate requirements into production-ready solutions.

Software Developer – Kinerk Direct Marketing Solutions (GardensAlive)

Jan 2012 – Sept 2022

- Developed and maintained large-scale e-commerce platforms using PHP (Smarty) and MySQL, serving multiple high-traffic consumer brands.
- Designed and optimized database queries and schema interactions to improve performance in data-heavy workflows.
- Led accessibility improvements across 19 production websites, achieving consistent Lighthouse accessibility scores of 95+.
- Built reusable templating systems and modular frontend-backend integrations using Smarty architecture.
- Improved system performance and reliability, contributing to 3× revenue growth during peak traffic periods.
- Diagnosed and resolved critical production issues in checkout and transaction flows.
- Integrated third-party APIs for payment, shipping, and analytics systems.
- Collaborated with cross-functional teams to ensure consistent data flow and system behavior.

- Participated in code reviews and contributed to maintaining engineering standards and best practices.

Projects

Red Rock Taxes – Fullstack Optimization, Migration & SEO Preservation

- Led end-to-end website migration including DNS configuration, domain transfer, and deployment.
- Designed and implemented 301 redirect strategy to preserve SEO rankings and prevent traffic loss.
- Improved backend-driven workflows and frontend UX for better client interaction.
- Ensured stable deployment and monitored post-migration system performance.

Ideaboard – API-driven Microservices System

- Built modular backend services using Node.js and Express for scalable system design.
- Designed API-driven architecture supporting independent service communication.

Leadership & Engineering Impact

- Provided technical guidance and mentorship to developers on best practices in frontend and backend development.
- Contributed to architectural decisions for scalable systems and reusable code patterns.
- Participated in code reviews, debugging, and continuous improvement initiatives.

Education

Bachelor's Degree – Computer Science / Engineering
