PROFILE SUMMARY

Results-driven Full-Stack Engineer with 12+ years' experience architecture and deploying scalable web and AI-integrated solutions for renowned US/global clients. Expert in end-to-end product ownership—from design and infra automation to front-end UX and back-end performance—using Python, JavaScript, React, Next.js, Tailwind, SQL, Docker, and cloud tools. Built high-impact platforms in eCommerce, SaaS, MarTech and ad-tech domains, consistently improving speed, reliability, conversion, and user engagement.

CORE SKILLS

Languages: Python | JavaScript | TypeScript | HTML | CSS | PHP | SQL

Frameworks/Libraries: React | Next.js | Vue.js | Node.js | Tailwind | jQuery

Databases: MySQL | PostgreSQL | Mongo (basic) | Redis | Clickhouse (familiarity)

DevOps & Infra: Docker | Linux | Terraform | GCP | AWS | Kubernetes (knowledge)

Automation/AI: OpenAI API | Data Visualization | Automated testing (Jest) | Marketing Automation

Other Skills: OAuth 2.0 | JWT | SEO/ADA Compliance | CICD (GitHub Actions, CircleCI) | Figma UI | API Integration | WordPress

Power Tools/Platforms: HubSpot | Clearbit | Google Tag Manager | SEMrush | Ahrefs

KEY ACHIEVEMENTS

- 25% improvement in lead conversion via advanced tracking and automation (Ahrefs, Clearbit, HubSpot)
- 40% faster page loads by optimizing legacy code and infra (Docker, CDN, caching)
- 98%+ website health score and 30% boost in organic traffic from technical SEO upgrades
- Delivered multi-site systems supporting >100 billion native ad impressions (Nova-scale projects)
- Led WCAG 95+ compliance for 16+ marketing sites, maximizing accessibility and session durations
- Built AI-driven chat/content solutions, reducing manual effort for clients by 50%

SELECTED PROJECTS

- Ideaboard App (Live Demo & GitHub): Architected full-stack microservices app with Docker, Next.js, Node, PostgreSQL. Delivered API Gateway and automated deployment.
