Summary

Senior Web Engineer with 13+ years of experience building high-performance, conversion-focused web platforms. Specialized in turning marketing websites into scalable growth engines through performance optimization, SEO strategy, and experimentation.

Proven track record of improving Core Web Vitals, increasing conversion rates (+25%), and enabling rapid iteration through modular architecture and reusable component systems. Strong experience collaborating with marketing, design, and product teams to deliver measurable business impact.

Core Skills

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+)

Architecture: Component Systems, Modular Design, API-driven UIs

Performance: Core Web Vitals, Page Speed Optimization, Lazy Loading, Code Splitting

SEO: Technical SEO, Structured Data, Metadata Optimization, Redirect Strategies

Experimentation: A/B Testing Concepts, Conversion Optimization, User Flow Analysis

CMS & Content: Headless CMS Concepts, Scalable Content Modeling

Tools: Vercel (conceptual), Git, CI/CD, Google Tag Manager

Quality: Accessibility (WCAG, ARIA), Cross-browser Compatibility, Responsive Design

Professional Experience

Marketing Web Developer – Measured

Oct 2023 – Nov 2024

- Owned full-stack development of marketing web platform, aligning engineering with growth and acquisition goals.
- Reduced page load time from 3.5s to 0.7s, significantly improving Core Web Vitals and user engagement.
- Increased lead conversion by 25% through UI/UX improvements, CTA optimization, and user flow refinement.
- Improved SEO score from 78% to 98% via structured data, semantic HTML, and technical SEO enhancements.
- Built reusable component systems enabling rapid landing page creation and campaign iteration.
- Collaborated closely with marketing and design teams to ship high-impact experiments quickly.
- Improved accessibility through semantic markup, ARIA roles, and contrast optimization.
- Ensured cross-browser compatibility and responsive design across devices.

Software Developer – Kinerk Direct Marketing Solutions (GardensAlive)

Jan 2012 – Sept 2022

- Developed and maintained large-scale marketing and e-commerce platforms serving multiple consumer brands.
- Led accessibility initiative across 19 websites, achieving consistent Lighthouse scores of 95+.
- Built scalable frontend-backend systems using PHP (Smarty), JavaScript, and MySQL.
- Improved performance and stability across high-traffic systems, contributing to 3× revenue growth.
- Implemented reusable UI and templating systems to support scalable content and campaign deployment.
- Diagnosed and resolved production issues impacting conversion-critical user flows.
- Integrated analytics and tracking tools to support data-driven decision making.

Projects

Red Rock Taxes – Website Migration & SEO Preservation

- Led full website migration including DNS configuration and SEO-safe 301 redirects.
- Preserved organic traffic and ensured zero downtime during transition.

Dynamic Category Platform – Lakshmi Iron Company

- Built scalable component-based frontend architecture for product discovery and navigation.

Engineering & Growth Impact

- Strong ownership mindset — delivered end-to-end solutions from architecture to production.
- Focused on measurable business outcomes: performance, conversion, and user engagement.
- Experienced in bridging marketing and engineering to enable rapid experimentation and growth.

Education

Bachelor's Degree – Computer Science / Engineering

Entrepreneurial Experience

Independent Growth Venture

- Built and scaled a 200+ member distributed team, generating Rs. 20M in revenue.
- Led growth strategy, onboarding, and retention across a multi-tier network.
- Applied data-driven decision making to improve engagement and conversion.
- Balanced venture execution alongside full-time engineering responsibilities.
