Professional Summary

Staff / Senior Product Engineer with 13.5 years of software development experience building production web applications, SaaS platforms, ecommerce systems, and performance-critical digital products. Brings deep full-stack expertise across JavaScript/TypeScript, Node.js, React/Next.js, PHP, SQL, and API-driven architectures, with 9+ years of backend/full-stack engineering experience. Proven track record delivering end-to-end product features, architecting scalable systems, improving performance/accessibility/SEO at scale, and collaborating cross-functionally to ship polished user-facing experiences. Combines strong engineering craft with product thinking, systems design judgment, and ownership mindset.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, PHP, SQL, Python, HTML5, CSS3/SASS
Frontend: React, Next.js, Redux, SSR/ISR, Responsive Design, Accessibility (WCAG), Core Web Vitals
Backend: Node.js, Express.js, PHP, REST APIs, GraphQL, Webhooks, Authentication
Databases: MySQL, PostgreSQL, MongoDB
Infrastructure: AWS, Docker, Linux, CI/CD, DNS, CDN, Caching
Architecture: API Design, Modular Systems, Microservices, Event-Driven Patterns
Tooling: Git, GitHub Actions, Lighthouse, GTMetrix, Postman, Monitoring/Logging Tools

Professional Experience

Senior Software Engineer / Full Stack Engineer

Measured

- Build and ship full-stack product features using Node.js, TypeScript, React, and Next.js across analytics and web platform products.
- Design backend APIs, integration services, and data workflows powering reporting, marketing, and customer-facing product functionality.
- Architect modular frontend/backend systems with emphasis on maintainability, scalability, and developer ergonomics.
- Partner with stakeholders across product, design, and engineering to scope, iterate, and deliver production-ready solutions.
- Contribute to code reviews, architecture discussions, and engineering quality/process improvements.

Senior Full Stack Developer

Gardens Alive

- Led full-stack development across 19+ high-traffic ecommerce and marketing properties using PHP, Smarty, JavaScript, and MySQL.
- Designed backend business logic, reusable application modules, and integrations for ecommerce/catalog/campaign systems.
- Built responsive, dynamic frontend experiences using JavaScript, HTML, CSS, and templating systems.
- Improved accessibility scores to 95+ across all managed properties by leading platform-wide accessibility modernization initiative.
- Optimized performance, rendering, and technical SEO across a large portfolio of customer-facing web properties.
- Supported experimentation, analytics/tracking, and marketing automation integrations.

Web Platform Engineer / Technical Consultant

Red Rock / Freelance / Client Projects

- Delivered full-stack development, architecture improvements, and platform migrations for diverse web properties.
- Managed DNS migrations, domain transfers, SEO-preserving redirect strategies, and hosting/platform transitions.
- Built custom WordPress/PHP solutions, integrations, and performance optimization strategies.
- Improved reliability, maintainability, and search performance during replatforming/migration projects.

Applied AI / Machine Learning Projects

- Built ML experimentation projects involving image classification, sentiment analysis, and traditional supervised learning using TensorFlow and Scikit-learn.
- Actively leverage AI/LLM tooling to accelerate engineering workflows, prototyping, debugging, and implementation planning.

Leadership & Additional Experience

- Built and led an independent organization of 200+ people while operating alongside full-time engineering roles.
- Managed INR 20M+ business turnover through systems thinking, leadership, mentoring, and operational execution.
