Customer Solutions Architect / Senior Full Stack Engineer

Technical customer-facing engineer with 13.5+ years of experience across full-stack development, solutions architecture, technical consulting, support engineering, and stakeholder-facing implementation ownership. Proven success translating business and technical requirements into scalable web solutions, debugging complex production issues, guiding stakeholders through technical decisions, and serving as a trusted advisor across onboarding, optimization, architecture, and adoption initiatives. Strong background in web application architecture, relational databases, API integrations, customer support systems, and high-touch technical stakeholder collaboration.

Core Skills

Solutions Architecture: Technical Discovery, Requirements Gathering, Solution Design, Architecture Reviews, Technical Consulting, Stakeholder Management

Development: JavaScript (ES6+), TypeScript, Node.js, PHP, Smarty PHP, React, Next.js, HTML5, CSS3, SASS

Databases: MySQL, PostgreSQL, SQL Querying, Relational Data Modeling

Platforms/Tools: HubSpot, Clearbit, Silverpop, WordPress, CRM/CMS Platforms, REST APIs, GTM, GA

Infrastructure: DNS, Domain Management, Hosting, Linux, Apache/Nginx, CI/CD, Git

Specialties: Debugging, Performance Optimization, Accessibility, SEO, Customer Support Engineering, Multi-Site Web Architecture

Professional Experience

Marketing Web Developer / Technical Owner

Measured

Oct 2023 – Nov 2024

- Served as sole technical owner of the company's marketing website and customer-facing web infrastructure within the marketing organization.
- Partnered directly with internal stakeholders to gather business/technical requirements, architect solutions, scope implementation plans, and deliver scalable web solutions.
- Built and maintained HubSpot CMS architecture including templates, modules, forms, automations, workflows, and platform customizations.
- Supported development of customer-facing support/help web experiences and onboarding-related web flows as part of evolving support operations.
- Diagnosed and resolved technical implementation issues across frontend, backend integrations, tracking systems, forms, and CRM workflows.
- Managed plugin/tool/platform evaluations, procurement, audits, and implementation decisions across marketing technology stack.
- Owned website performance, technical SEO, accessibility, analytics, attribution, and platform stability.
- Acted as technical liaison between marketing, growth, operations, and engineering stakeholders.

Senior Web Developer / Full Stack Engineer

Gardens Alive

Jan 2012 – Sep 2022

- Developed and maintained 19+ high-traffic ecommerce/content websites across a multi-brand portfolio using PHP, Smarty, JavaScript, MySQL, HTML, and CSS.
- Served as technical support and implementation partner for merchandising, operations, marketing, and internal business teams across production systems.
- Investigated, triaged, debugged, and resolved complex production issues affecting customer experience, business operations, and campaign execution.
- Gathered stakeholder requirements and translated business requests into scalable technical solutions within large legacy production systems.
- Integrated and maintained CRM/marketing automation systems including Silverpop and campaign-related customer communication tooling.
- Built reusable frontend/backend modules enabling scalable merchandising, campaign, and operational workflows.
- Led accessibility initiative across the portfolio, improving managed websites to 95+ accessibility benchmark scores.

- Diagnosed performance bottlenecks and implemented optimizations across frontend/backend systems in high-traffic production environments.

Web Developer (Freelancer)
Mar 2024 – Now

Red Rock Taxes

- Delivered technical consulting and full-stack development for multiple client websites and digital platforms.
- Led direct client discovery, requirements gathering, architecture planning, and implementation discussions.
- Managed DNS, hosting, domain migrations, SSL, server configuration, and deployment troubleshooting.
- Performed website audits, optimization, technical SEO improvements, and infrastructure troubleshooting.

Selected Technical Projects

Machine Learning / AI Projects

Deep Learning Practice Repository
Traditional Machine Learning Repository

- Built practical ML/AI projects involving TensorFlow, Scikit-learn, CNNs, feature engineering, sentiment analysis, classification pipelines, and model evaluation workflows.

Education

Bachelor’s Degree in Computer Applications
