Senior WordPress / Full Stack Developer

Senior Web Developer with **13.5+ years of experience** building, optimizing, maintaining, and scaling high-traffic websites and ecommerce platforms across WordPress, PHP, MySQL, JavaScript, React, and modern frontend ecosystems. Strong ownership mindset with deep experience in production debugging, website performance optimization, SEO-focused engineering, conversion optimization, and end-to-end feature delivery. Proven track record handling complex multi-site environments, shipping fast under pressure, and improving operational efficiency through automation and scalable engineering solutions.

Core Skills

WordPress & PHP: WordPress Development, Plugin Customization, Theme Development, PHP, MySQL, REST APIs, WooCommerce, CMS Architecture

Frontend Engineering: JavaScript (ES6+), React, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI Development

Performance & SEO: Core Web Vitals, PageSpeed Optimization, Technical SEO, Lazy Loading, Asset Optimization, Accessibility Improvements

Tools & Infrastructure: Git, GitHub, Webpack, Composer, NPM, CI/CD, Vercel, Hosting, DNS, Deployment Management

Integrations: Stripe, APIs, Marketing Platforms, Analytics Tracking, CRM Integrations

Specialties: Production Debugging, Legacy Refactoring, Multi-site Architecture, Conversion Optimization, Automation, Async Remote Collaboration

Professional Experience

Marketing Web Developer / Frontend Owner

Measured

Oct 2023 – Nov 2024

- Owned frontend development and optimization for company marketing website, shipping production-ready features from design to deployment with high autonomy.
- Improved website load performance from approximately **3 seconds to 0.7 seconds** through aggressive frontend optimization, lazy loading, script reduction, and asset optimization.
- Increased lead conversion rates by approximately **25%** by redesigning user journeys, forms, and conversion-focused UX flows.
- Built scalable reusable frontend systems and modular page structures that accelerated campaign launches and reduced implementation overhead.
- Worked closely with marketing, product, and design stakeholders to rapidly ship experiments, landing pages, and growth-focused website enhancements.
- Contributed to customer support platform workflows and debugging efforts during early-stage operational scaling initiatives.
- Diagnosed and resolved production issues, rendering bottlenecks, third-party script conflicts, and performance regressions across environments.

Senior Web Developer / Ecommerce Systems Engineer

Gardens Alive

Jan 2012 – Sep 2022

- Built, maintained, optimized, and supported **19+ high-traffic ecommerce and content websites** across large-scale gardening and consumer brands.
- Led critical engineering initiatives during a complex **22-brand platform crisis intervention**, stabilizing production systems, resolving operational bottlenecks, and restoring website reliability.
- Developed automation workflows and operational tooling that improved internal execution efficiency by approximately **95%** for specific repetitive merchandising and workflow tasks.
- Worked extensively across WordPress/PHP-based systems, frontend engineering, ecommerce workflows, and database-driven content architectures.

- Maintained and optimized large-scale website infrastructures with strong emphasis on performance, SEO, reliability, accessibility, and conversion optimization.
- Built reusable UI systems, landing pages, templates, merchandising modules, and campaign-driven website experiences.
- Diagnosed and resolved complex frontend/backend production issues involving APIs, databases, rendering issues, browser inconsistencies, and deployment failures.
- Collaborated with marketing, merchandising, SEO, and engineering stakeholders to deliver rapid feature rollouts and website enhancements.
- Improved accessibility standards and frontend usability across multiple brands, achieving **95+ accessibility scores** on key websites.
- Worked extensively with PHP, MySQL, JavaScript, jQuery, HTML, CSS, ecommerce systems, hosting environments, and deployment workflows.
- Managed website updates, bug fixes, optimization initiatives, and operational support for business-critical production systems serving large user bases.

Career Counselor & Digital Marketing Executive

Pioneer Mathematics

Apr 2011 – Dec 2011

- Managed student counseling, online program promotion, and digital marketing communication initiatives.
- Created and executed marketing email campaigns promoting online educational packages and learning programs.
- Worked directly with prospective students and customers, strengthening communication, support, and relationship management skills.

Web Developer

Red Rock Taxes

Jun 2025 – Dec 2026

- Delivered frontend and full-stack development for client-facing websites and web applications.
- Built responsive interfaces and optimized performance, SEO, and user experience across multiple projects.
- Managed deployment workflows, hosting infrastructure, DNS configuration, and production optimizations.

Selected Projects

Lakshmi Iron Company Website

Project Portfolio

- Built a modern business website using **Next.js**, responsive UI architecture, and SEO-focused frontend engineering.
- Implemented optimized page structures, fast-loading UI components, and conversion-focused user experiences.

MomDigital Platform (Ongoing Project)

Project Portfolio

- Currently developing a modern full-stack platform using **Next.js**, **Node.js**, and scalable frontend/backend architecture.
- Working on modular systems, API integrations, dashboard workflows, and AI-assisted automation concepts.

Machine Learning & AI Engineering Projects

Deep Learning Repository

Machine Learning Repository

- Developed machine learning and deep learning projects using Python, TensorFlow, Scikit-learn, and modern AI workflows.
- Exploring AI integrations, intelligent automation systems, and LLM-assisted development workflows to build future-ready engineering capabilities.

Education

Bachelor's in Computer Applications

Additional Highlights

- Strong experience working in fast-paced remote and async collaboration environments.
- Proven ability to independently own projects end-to-end from scoping and development to deployment and optimization.
- Comfortable working across frontend, backend, debugging, performance optimization, and infrastructure-related tasks.
- Passionate about building scalable systems that balance engineering quality, user experience, SEO performance, and business impact.
