PROFESSIONAL SUMMARY

Full-Stack Engineer with **12+ years of experience** building scalable web platforms, eCommerce systems, and API-driven applications for U.S. businesses. Strong expertise in JavaScript ecosystems, backend architecture, and performance optimization.

Currently expanding into **AI-driven systems and data workflows**, with hands-on work in machine learning experimentation, model evaluation, and data preprocessing using Python ecosystems. Experienced in designing automation-friendly systems, integrating third-party services, and supporting infrastructure operations such as DNS management and deployment workflows.

TECHNICAL SKILLS

Frontend : React, Next.js, JavaScript (ES6+), jQuery, AJAX, SCSS, Tailwind CSS

Backend & Architecture: Node.js, Express, PHP, REST APIs, Microservices Concepts, API Gateway Patterns, Docker

Machine Learning & Data : Python, Pandas, NumPy, Regression, Classification, Feature Engineering Model Evaluation (Precision, Recall, Confusion Matrix), Scikit-learn, PyTorch, Matplotlib, Seaborn SQL / SQLite

Cloud & Tools: AWS (deployment exposure), Git, Bitbucket, Jira, Agile workflows

Automation & Integration: API integrations, data pipelines, third-party service integrations, workflow automation support

FREELANCE & INDEPENDENT PROJECTS

Dynamic Category & Multi-Brand Platform – Lakshmi Iron Company

- Designed scalable category and brand mapping architecture supporting multi-brand product relationships.
 - Implemented reusable UI components and structured product discovery flows.
 - Built dynamic category relationships enabling flexible product grouping and expansion.
-

Red Rock Taxes – Website Optimization, Domain Migration & Integrations

- Implemented website updates and service page improvements to support client workflows.
- Managed **domain transfer and DNS configuration updates** during platform transition.
- Updated DNS records and configured **redirect routing after domain migration** to maintain traffic continuity and preserve existing links.

- Implemented **email marketing integration using Mailchimp**, including hard-coded form integration and subscriber capture workflows.
- Assisted with website performance improvements and structured navigation updates.
- Supported operational workflows including service forms and client interaction flows.

(Email marketing platform used: Mailchimp)

Ideaboard – Microservices Architecture

GitHub: <https://github.com/yogitamittal93/ideaboard>

Live: <https://ideaboard-5ma18h8qh-yogitasingla93s-projects.vercel.app/>

- Designed **Node.js + Express API Gateway architecture** connecting modular services.
 - Implemented **Dockerized service architecture** with PostgreSQL data storage.
 - Built scalable backend workflows for idea creation, management, and collaboration features.
-

PROFESSIONAL EXPERIENCE

Marketing Web Developer – Measured

- Reduced site load time from **3.5 seconds to 0.7 seconds** through frontend optimization and performance tuning.
 - Increased SEO health score from **78% to 98%** through structured metadata and content architecture improvements.
 - Built scalable content systems including Events, FAQs, and Resources sections.
 - Improved lead conversion by **25%** through UX and structured content improvements.
 - Collaborated with marketing, design, and analytics teams to improve performance and engagement.
-

Software Developer – Kinerk Direct Marketing Solutions

(Gardens Alive Portfolio)

- Contributed to frontend and backend redesign for Breck's Gifts and related brands.
 - Integrated third-party APIs improving checkout and order workflows.
 - Performance improvements contributed to **~3× revenue growth across two brands during COVID**.
 - Diagnosed and resolved revenue-impacting cart and checkout issues.
 - Modernized legacy PHP architecture with structured JavaScript improvements.
-

AI / MACHINE LEARNING EXPERIENCE

AI/ML Internship Track – A2IT Internedge (Ongoing)

- Building machine learning models using Python and Scikit-learn.
- Conducting **data preprocessing, scaling, encoding, and feature engineering**.
- Applied **regression and classification techniques** to structured datasets.
- Performed exploratory data analysis and visualization using Pandas, Matplotlib, and Seaborn.
- Exploring to NLP preprocessing techniques for text datasets.
