Summary

Senior Full-Stack Engineer with 13+ years of experience building high-performing marketing websites, web applications, and e-commerce platforms. Strong focus on frontend architecture, performance optimization, and user experience quality.

Experienced in building reusable component systems, improving visual hierarchy and interaction flows, and collaborating closely with design and marketing teams to drive engagement and conversions. Comfortable working in async, remote-first environments and iterating on live systems.

Core Skills

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

UI & UX: Component Systems, Design Consistency, Responsive Design, Accessibility Basics, Interaction Improvements

Backend: Node.js, Express, REST APIs, API Integrations

Database: PostgreSQL, MySQL

Performance: Web Vitals, SEO Optimization, Load Time Reduction, Debugging Production Issues

Tools: Git, Docker, AWS (basic), CI/CD, Google Tag Manager, Analytics Integrations

Workflow: Async Collaboration, Agile, Cross-functional Teamwork

Professional Experience

Marketing Web Developer – Measured

Oct 2023 – Nov 2024

- Improved site performance by reducing load time from 3.5s to 0.7s through frontend optimization and efficient asset handling.
- Increased SEO health score from 78% to 98% by restructuring metadata and content architecture.
- Built reusable UI components and scalable content systems (Events, FAQs, Resources) to improve development speed and consistency.
- Improved lead conversion by 25% through UX enhancements, better content structure, and clearer user flows.
- Collaborated closely with design, marketing, and analytics teams to iterate on page layouts, hierarchy, and engagement patterns.
- Contributed to improving interaction quality through structured layouts and better visual feedback across pages.

Software Developer – Kinerk Direct Marketing Solutions

Jan 2012 – Sept 2022

- Contributed to frontend and backend redesign across multiple e-commerce brands in the Gardens Alive portfolio.
- Improved frontend performance and usability across high-traffic platforms, contributing to 3× revenue growth during COVID.
- Built and enhanced reusable frontend structures within legacy systems to improve maintainability.
- Diagnosed and resolved critical cart and checkout issues impacting revenue and user experience.
- Integrated third-party APIs to streamline checkout flows and improve operational efficiency.

Projects

Dynamic Category & Multi-Brand Platform – Lakshmi Iron Company

- Designed scalable category and brand mapping architecture supporting multi-brand relationships.

- Built reusable UI components and structured product discovery flows for improved navigation and UX.
- Focused on clean layout structures and consistent component patterns for scalability.

Red Rock Taxes – Website Optimization & Integrations

- Improved website structure, navigation, and service pages for better usability and conversion.
- Managed domain migration, DNS configuration, and SEO-preserving redirects.
- Implemented structured forms, email workflows, and integrations to improve client interaction flows.

Ideaboard – Microservices Architecture

- Built Node.js + Express API Gateway architecture connecting modular services.
- Implemented Docker-based architecture with PostgreSQL.
- Developed scalable backend workflows for idea management and collaboration.

AI / Machine Learning (Ongoing)

- Hands-on experience with data preprocessing, feature engineering, and model evaluation using Python.
- Working with Pandas, NumPy, and Scikit-learn for structured datasets.
- Exploring NLP preprocessing techniques.

Education

Bachelor's Degree – Computer Science / Engineering
