Summary

Data-driven marketing technologist with 10+ years of experience bridging marketing, analytics, engineering, and reporting infrastructure across high-traffic digital businesses. Experienced in marketing performance analysis, conversion tracking, campaign measurement, dashboard/reporting systems, GTM implementation, and translating marketing data into actionable business insights.

Strong technical foundation across analytics engineering, web tracking, data integration, SQL/data modeling concepts, and stakeholder-facing reporting.

Core Skills

Marketing Analytics: Funnel Analysis, Attribution, Campaign Performance, Conversion Optimization

Tracking / Measurement: Google Tag Manager, Event Tracking, Pixel/Tag Implementation, UTM Governance

Reporting / BI: Looker Studio / Dashboarding, Marketing Reporting, KPI Visualization

Data / Technical: SQL, BigQuery Concepts, Data Modeling, Data Validation, API Integrations

Marketing Platforms: HubSpot, CRM/Email Marketing Systems, Marketing Automation

Tools / Dev: JavaScript, HTML/CSS, REST APIs, Spreadsheet Modeling, Debugging

Professional Experience

Marketing Web Developer / Analytics Partner — Measured

Oct 2023 – Nov 2024

- Partnered closely with marketing and growth teams to measure campaign/site performance and optimize conversion funnels across digital acquisition channels.
- Built and maintained tracking implementations for marketing initiatives, ensuring accurate attribution and event capture across campaigns and landing pages.
- Developed reporting dashboards and performance summaries used by stakeholders to monitor traffic, conversion, and funnel performance.
- Identified conversion bottlenecks through funnel analysis and performance diagnostics, contributing to a 25% increase in conversion rates.
- Improved SEO/technical performance visibility through structured reporting and technical performance analysis.
- Supported experimentation and iterative optimization by enabling reliable measurement infrastructure for campaign and landing page testing.

Software Developer / Marketing Systems Contributor — Gardens Alive / Kintern

Jan 2012 – Sept 2022

- Supported email marketing and ecommerce campaign initiatives through technical implementation and performance-focused optimization across 19+ websites.
- Collaborated with marketing teams on campaign deployment, tracking setup, landing page development, and customer journey optimization.
- Contributed to revenue-driving lifecycle/email marketing initiatives by improving technical execution and campaign landing experiences.
- Analyzed user behavior and campaign/site performance trends to recommend UX and technical improvements.
- Maintained and optimized large-scale ecommerce web properties used for high-volume seasonal marketing campaigns.

Relevant Projects

Marketing Reporting Infrastructure Improvements

- Improved consistency and reliability of campaign performance reporting by standardizing tracking implementation patterns.
- Designed scalable reusable tracking/data structures to improve measurement quality across campaigns.

Education

Bachelor's Degree — Computer Science / Engineering
