India (Remote)

Senior Full Stack Software Engineer

Senior Full Stack Engineer with 13.5+ years of experience building and maintaining large-scale web platforms across PHP, JavaScript, Node.js, and MySQL ecosystems. Deep expertise in developing CMS-driven and conversion-focused web applications, integrating third-party APIs and business systems, optimizing performance/accessibility, and supporting secure, high-traffic production environments. Experienced collaborating across distributed teams to deliver scalable, reliable software powering revenue-critical digital experiences.

Core Technical Skills

Languages/Frameworks: PHP, Smarty PHP, JavaScript (ES6+), TypeScript, Node.js, React, HTML5, CSS3, SASS
Backend/Infrastructure: LAMP Stack, REST APIs, Webhooks, Server-Side Rendering, Cron Jobs, Linux/CLI, Apache/Nginx

Databases: MySQL, PostgreSQL, Query Optimization, Relational Schema Design

Platforms/Systems: CMS Architecture, CRM Integrations, Marketing Automation, Analytics/Tracking Systems

Practices: Accessibility (WCAG), Performance Optimization, SEO Preservation, Testing, CI/CD, Git, Agile/Scrum

Professional Experience

Senior Full Stack Engineer / Web Platform Engineer

Various Remote

2016 – Present

- Architected and maintained large-scale CMS-driven and ecommerce web platforms serving multiple high-traffic consumer brands, balancing performance, accessibility, maintainability, and conversion goals.
- Developed reusable frontend and backend systems using PHP/Smarty, JavaScript, and MySQL to support campaign-driven marketing and merchandising workflows.
- Built and maintained integrations with third-party APIs, internal business tools, CRM/marketing platforms, analytics systems, and operational reporting services.
- Improved accessibility standards across 19+ production web properties, leading initiatives that achieved 95+ accessibility scores and materially improved UX compliance.
- Led complex SEO-preserving migration and redirection strategies across large site restructures and DNS/domain transitions.
- Supported distributed teams through architecture planning, code reviews, debugging assistance, and technical mentorship.
- Collaborated cross-functionally with marketing, design, product, and operations teams to translate business requirements into scalable technical solutions.

Senior Web Developer / Full Stack Engineer

Gardens Alive / Affiliate Brands

2019 – 2025

- Developed and maintained 19+ large-scale ecommerce and content websites using Smarty PHP, JavaScript, MySQL, and custom CMS tooling.
- Implemented dynamic campaign, merchandising, and promotional modules enabling business teams to manage seasonal and fundraising-like campaign experiences efficiently.
- Integrated analytics, attribution, tracking, and marketing automation systems to improve campaign measurement and reporting visibility.
- Built reusable frontend components and backend templates for scalable multi-site deployment across numerous brand properties.
- Optimized page performance, frontend rendering, and accessibility, consistently achieving 95+ accessibility scores across the portfolio.
- Diagnosed and resolved complex production issues in high-traffic environments with minimal downtime.

Web Platform Developer / Technical Consultant

Red Rock / Measured / Client Projects

2013 – 2019

- Delivered custom web development, CMS implementations, frontend architecture, and backend integrations for client-facing digital platforms.
 - Managed domain, DNS, hosting, deployment, and migration workflows including SEO-safe URL restructuring and infrastructure transitions.
 - Built custom dashboards, reporting interfaces, and administrative tooling to improve client operational visibility.
 - Partnered directly with stakeholders to scope requirements, estimate technical effort, and deliver iterative solutions in agile environments.
-

Selected Impact Highlights

- Improved accessibility and frontend quality across 19+ production websites to 95+ accessibility benchmark scores.
 - Led SEO-sensitive domain/DNS/platform migrations preserving organic search equity and minimizing traffic disruption.
 - Supported revenue-critical web platforms handling major campaign traffic spikes and seasonal high-load events.
 - Built scalable reusable component systems enabling faster multi-site campaign/page launches across brand portfolios.
-

Additional Technical Projects

Machine Learning / AI Engineering Projects

Deep Learning Practice Repository

Traditional Machine Learning Repository

- Built hands-on ML projects involving TensorFlow, Scikit-learn, classification pipelines, EDA, and model evaluation workflows.
-

Education

Bachelor's Degree in Engineering / Computer Science Equivalent Experience
