

Yogita Mittal (+91-8360492810)

Senior Full Stack Engineer (JavaScript | Node.js | React | AWS)

yogitamittal.tech@gmail.com | github.com/yogitamittal93 | linkedin.com/in/yogitamittaltech

Professional Summary

Full Stack Engineer with **13+ years of Fullstack experience** building scalable web applications, SaaS platforms, and high-traffic ecommerce systems across **frontend, backend, and database layers**.

Expert in Node.js API development, React frontend architecture, relational database design, and cloud-native deployments in AWS environments. Strong experience building RESTful services, asynchronous data pipelines, and scalable UI systems using modern JavaScript frameworks.

Proven ability to modernize legacy codebases, integrate complex third-party systems, design database schemas, and ship production-grade applications end-to-end. Experienced working with US-based distributed teams and startup environments delivering fast, reliable product iterations.

Core Technical Skills

Programming	Backend Development	Frontend Development	Other	Databases
PHP-10+ yrs JavaScript 10+ yrs Python — 1 yr	Node.js — 5+ yrs REST API Development — 6+ years Asynchronous Programming (Promises, Async/Await, Generators) — 7+ yrs	React.js — 6+ yrs Next.js — 4+ yrs Redux — 4+ yrs HTML5 / CSS3 — 13+ yrs Responsive Web Development — 13+ yrs Stylus / SASS / LESS — 5+ yrs	Docker, Containerization, AWS, Git / GitHub / Bitbucket — 8+ yrs , Webpack — 5+ yrs NPM — 6+ yrs AJAX / jQuery — 10+ yrs 3rd-party API Integrations — 8+ yrs Legacy System Modernization — 7+ yrs	MySQL — 8+ yrs PostgreSQL — 4+ yrs Relational Database Design — 7+ yrs

Key Full Stack Projects

Ideaboard — Microservices Full Stack Application [GitHub: github.com/yogitamittal93/ideaboard](https://github.com/yogitamittal93/ideaboard)

- Designed and developed a **full-stack ideation platform using microservices architecture**.
 - Built backend APIs using **Node.js and Express with API Gateway architecture**.
 - Implemented **PostgreSQL relational database schema** for persistent data storage.
 - Containerized services using **Docker and Docker Compose**.
 - Deployed frontend on **Vercel** and backend services on **Render**.
 - Implemented **interactive sticky-note UI for real-time idea management**.
-

Dynamic Ecommerce Platform — Full Stack Next.js Application

GitHub: github.com/yogitamittal93/our-company

- Built a **dynamic ecommerce platform using Next.js and modern JavaScript architecture**.
 - Implemented **scalable category and brand routing architecture**.
 - Designed **multi-brand product mapping logic** allowing products to appear across multiple brand pages.
 - Implemented **interactive product quick-view modals and product browsing UI**.
 - Integrated **WhatsApp-based “Get Quote” system** for instant customer engagement.
 - Built **review and rating system using Supabase database backend**.
-

Professional Experience

Freelance Full Stack Developer (Remote)

Nov 2024 – Present

- Design and develop **end-to-end SaaS and ecommerce applications using React, Next.js, Node.js, and relational databases**.
 - Architect and implement **RESTful APIs for data processing workflows and system integrations**.
 - Build scalable **React component architectures and frontend UI systems**.
 - Design **database schemas and optimized SQL queries using MySQL and PostgreSQL**.
 - Implement **third-party API integrations, messaging systems, and automation workflows**.
 - Deploy and maintain applications in **cloud-hosted environments**.
-

Full Stack Developer — Measured (Remote, US)

Oct 2023 – Nov 2024

- Developed scalable **frontend architecture using React and modern JavaScript frameworks**.
 - Implemented **API-driven interfaces integrating backend services and analytics platforms**.
 - Built reusable component systems improving **development velocity and UI consistency**.
 - Optimized performance through **bundle optimization, asset management, and code splitting**.
 - Improved SEO and content structure across key marketing pages.
-

Full Stack Developer — Gardens Alive (Ecommerce Platforms)

Worked across multiple ecommerce brands including:

Breck's Gifts, Spring Hill Nursery, Gurney's, Brecks, Michigan Bulb, KVB Bulbs, Weeks & Roses

Key Contributions:

- Implemented **full-stack ecommerce features including frontend UI, backend logic, and database interactions**.
 - Modernized **legacy JavaScript and jQuery codebases**, improving maintainability and performance.
 - Built **complex cart functionality and checkout workflow enhancements** including pricing rules and promotional systems.
 - Integrated third-party services including:
 - **Keycode promotion systems**
 - **PowerReviews product review platform**
 - **briteverify validation services**
 - Developed **AJAX-driven dynamic product interactions and cart updates**.
 - Implemented backend logic supporting **Plant Finder product discovery system**.
 - Delivered reliable features for **high-traffic ecommerce platforms with large product catalogs**.
-

Additional Information

Experience working with **US-based distributed teams**

Strong ability to **design and deliver full-stack features independently**

Experienced building **SaaS platforms, ecommerce systems, and automation workflows**

Currently expanding expertise in **Machine Learning, Python, and Data Analysis**
