India (Remote)

Senior Full Stack Engineer

Senior Full Stack Engineer with 13.5+ years of experience building, scaling, and maintaining production web platforms across PHP, JavaScript, Node.js, MySQL, and modern frontend ecosystems. Deep expertise in legacy PHP modernization, CMS/CRM integrations, high-traffic multi-site web architecture, marketing/fundraising-adjacent campaign systems, accessibility, SEO, and performance optimization. Proven record of owning mission-critical web platforms end-to-end in distributed environments.

Core Skills

Languages: PHP, Smarty PHP, JavaScript (ES6+), TypeScript, Node.js, HTML5, CSS3, SASS

Frameworks/Libraries: React, Next.js, Express.js

Databases: MySQL, PostgreSQL

Platforms/Tools: Silverpop, HubSpot, WordPress, GTM, GA, CRM/CMS Systems, REST APIs

Infrastructure: DNS, Domain Management, Hosting, Linux, Apache/Nginx, CI/CD, Git

Specialties: Accessibility, Core Web Vitals, SEO Preservation, Multi-Site Architecture, Technical Audits

Professional Experience Web Developer (Freelancer)

Red Rock Taxes

Jun 2010 – Dec 2011

- Delivered full-stack web development and technical consulting for multiple client websites and digital platforms.
- Managed DNS configuration, domain transfers, hosting environments, SSL setup, and server/infrastructure troubleshooting.
- Executed domain migrations, DNS transfers, and infrastructure transitions while preserving SEO equity through strategic redirect mapping, canonicalization, and technical SEO safeguards.
- Performed website optimization across frontend performance, technical SEO, caching, and load-time improvements.
- Worked directly with clients to scope requirements, estimate technical work, and deliver custom web solutions.

Marketing Web Developer

Measured

Oct, 2023 – Nov, 2024

- Sole technical owner of the company's marketing website and web infrastructure within the marketing team, responsible for all website engineering, technical strategy, implementation, and maintenance.
- Managed complete HubSpot development lifecycle including landing pages, templates, modules, forms, automation-related frontend/backend integrations, and CMS customization.
- Led technical evaluation, procurement, implementation, and auditing of plugins/tools/platform subscriptions for marketing and web operations.
- Owned website performance, technical SEO, accessibility, conversion optimization, analytics integrations, and platform stability.
- Improved website performance from 3.0s load times to 0.7s through frontend optimization, script audits, asset refactoring, caching strategies, and technical performance remediation.
- Increased website lead conversion rate by 25% through CRO-driven form redesign, UX simplification, funnel optimization, and iterative experimentation with marketing stakeholders.
- Re-architected and optimized lead capture workflows including form shortening, progressive profiling, CRM integrations, and attribution/tracking instrumentation across the marketing funnel.
- Partnered directly with growth/marketing leadership to rapidly execute campaign launches, landing pages, experiments, and conversion-focused web initiatives.
- Implemented tracking, analytics, attribution, and tag management integrations supporting reporting and funnel visibility.

Fullstack Software Developer

Gardens Alive

Jan 2012 – Sep 2022

- Developed and maintained 19+ high-traffic ecommerce/content websites across the company's multi-brand portfolio using legacy Smarty PHP, JavaScript, MySQL, HTML, and CSS.

- Worked extensively within large legacy PHP/Smarty codebases, modernizing frontend/backend functionality while preserving business continuity in production-critical systems.
- Led accessibility modernization initiative across 19+ production websites, achieving and maintaining 95+ accessibility scores portfolio-wide through semantic HTML improvements, ARIA implementation, keyboard navigation support, and frontend remediation.
- Built reusable frontend/backend modules and templates enabling scalable deployment of campaigns, merchandising components, and brand-specific site features.
- Engineered reusable Smarty PHP/JavaScript component systems and frontend templates to standardize campaign deployment and accelerate multi-brand merchandising rollouts across 19+ web properties.
- Integrated and maintained CRM/marketing automation systems including Silverpop for email marketing and campaign workflows.
- Developed and maintained complex email marketing and CRM-integrated web workflows using Silverpop/IBM Marketing Cloud, supporting personalized campaigns, triggered communications, and customer segmentation initiatives.
- Built and optimized dynamic promotional, merchandising, and seasonal campaign experiences supporting revenue-critical ecommerce initiatives across multi-brand portfolio.
- Diagnosed and resolved complex production issues in high-traffic environments with emphasis on performance, reliability, and maintainability.
- Collaborated with marketing, merchandising, design, and business teams to translate requirements into scalable technical implementations.

Selected Technical Projects

Machine Learning / AI Projects

Deep Learning Practice Repository

Traditional Machine Learning Repository

- Built practical ML projects involving TensorFlow, Scikit-learn, CNNs, sentiment analysis, classification pipelines, feature engineering, and model evaluation workflows.

Education

Bachelor's Degree in Computer Applications.
