

Yogita Mittal

Senior Frontend Engineer (React / TypeScript / Web Architecture)

India • Remote Friendly

yogitamittal.tech@gmail.com — +91 8360492810

GitHub — LinkedIn — Portfolio

Summary

Senior Frontend Engineer with 13+ years of experience building scalable, high-performance web applications and consumer-facing products. Deep expertise in React, TypeScript, and modern web architecture.

Strong track record of owning features end-to-end — from scoping and architecture decisions to implementation, performance optimization, and post-launch iteration. Experienced in defining success metrics (conversion, engagement, performance) and validating product decisions against real-world data.

Comfortable working in remote, async environments and collaborating across product, design, and backend teams to deliver polished, reliable user experiences.

Core Skills

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

Architecture: Component Systems, SSR / CSR / ISR Patterns, API-driven UIs, Modular Design

Performance: Web Vitals, Load Optimization, Lazy Loading, Asset Optimization

Quality: Cross-browser Compatibility, Responsive Design, Accessibility (WCAG, semantic HTML, ARIA), Debugging

Backend: Node.js, Express, REST APIs

Data & Metrics: Analytics Integration, Conversion Tracking, A/B Thinking

Tools: Git, Docker, AWS (basic), CI/CD, Google Tag Manager

Workflow: Async Collaboration, Agile, Cross-functional Leadership

Professional Experience

Marketing Web Developer – Measured

Oct 2023 – Nov 2024

- Owned end-to-end development of marketing web experiences, from requirement scoping to deployment and iteration.
- Led frontend architecture decisions for marketing pages, balancing performance, SEO, and user experience.
- Reduced site load time from 3.5s to 0.7s through code splitting, asset optimization, and efficient rendering strategies.
- Increased SEO health score from 78% to 98% by restructuring metadata, semantic HTML, and content architecture.
- Improved lead conversion by 25% by refining UI hierarchy, CTA placement, and user flows based on behavioral insights.
- Built reusable component systems and scalable content modules, improving development speed and consistency.
- Defined and tracked success metrics (performance, engagement, conversion) and iterated based on data.
- Ensured cross-browser compatibility and responsive behavior across devices and screen sizes.
- Collaborated closely with design, product, and analytics teams to deliver polished, user-focused experiences.

Software Developer – Kinerk Direct Marketing Solutions

Jan 2012 – Sept 2022

- Contributed to development and maintenance of large-scale e-commerce platforms serving multiple brands under the GardensAlive portfolio.
- Led accessibility improvements across 19 consumer-facing websites, increasing Lighthouse accessibility scores to 95+ through standardized semantic HTML, ARIA roles, and UI consistency.
- Established reusable frontend patterns and guidelines to ensure accessibility compliance across multiple properties.

- Improved frontend performance and stability across high-traffic systems, contributing to $3\times$ revenue growth during COVID.
- Designed and implemented reusable frontend structures within legacy systems to improve scalability and maintainability.
- Diagnosed and resolved critical production issues impacting checkout flows and revenue.
- Integrated third-party APIs to enhance product workflows and user experience.
- Collaborated with backend teams to ensure seamless data flow and consistent user experience across systems.

Projects

Dynamic Category & Multi-Brand Platform – Lakshmi Iron Company

- Designed scalable frontend architecture for dynamic category and brand relationships.
- Built reusable UI components and structured product discovery flows for improved usability.
- Focused on clean, modular design enabling future scalability and extension.

Red Rock Taxes – Website Optimization, Migration & SEO Preservation

- Led full website migration including DNS configuration, domain transfer, and deployment without service disruption.
- Designed and implemented 301 redirect strategy to preserve SEO rankings and prevent traffic loss during migration.
- Ensured zero-loss transition of indexed pages by mapping legacy URLs to new structure.
- Improved user experience through better navigation, structured forms, and optimized service flows.
- Increased accessibility compliance by improving semantic HTML, contrast ratios, and keyboard navigation.
- Monitored post-migration performance and SEO metrics to validate stability and recovery.

Ideaboard – Microservices Architecture

- Built API-driven architecture using Node.js and Express with modular services.
- Implemented scalable backend workflows and structured service communication.

AI / Machine Learning (Ongoing)

- Hands-on experience with data preprocessing, feature engineering, and model evaluation using Python.
- Working with Pandas, NumPy, and Scikit-learn for structured datasets.

Education

Bachelor's Degree – Computer Science / Engineering
