India (Remote)

Technical Solutions Engineer / Web Solutions Specialist

Technical Solutions Engineer with **13.5+ years of experience** delivering scalable web solutions, troubleshooting production systems, and partnering with business stakeholders to implement high-impact digital experiences. Strong expertise across **web technologies, analytics/tracking implementations, technical debugging, customer-facing technical support, and scalable solution design**. Proven ability to own solution lifecycle from requirements gathering through launch, optimization, and maintenance.

Core Skills

Web Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript, HTTP, REST APIs

Programming: JavaScript, PHP, Node.js, Python (ML/Automation), SQL

Frontend/Frameworks: React, Next.js, Tailwind CSS

Analytics/Tracking: Google Tag Manager, CRM Integrations, Attribution, Event Tracking

Platforms/Systems: HubSpot, Silverpop, CMS/CRM Platforms, WordPress

Databases: MySQL, PostgreSQL

Cloud/Infrastructure: DNS, Hosting, Virtualized Environments, CI/CD, Linux

Specialties: Technical Troubleshooting, Solution Design, Stakeholder Communication, Performance Optimization

Professional Experience

Marketing Web Developer / Technical Owner

Measured

Oct 2023 – Nov 2024

- Served as the **sole technical owner** of the company marketing website and web systems within the marketing organization.
- Gathered requirements from stakeholders and translated business goals into scalable technical implementations.
- Designed and implemented tracking, attribution, analytics, and CRM integrations to improve campaign visibility and reporting.
- Improved website performance from **3s to 0.7s load time** through frontend and infrastructure optimization.
- Increased lead conversion by **25%** via UX, form, and conversion funnel optimization.
- Troubleshot production issues across frontend systems, integrations, and user-reported technical issues.
- Managed full solution lifecycle: discovery, implementation, launch, optimization, maintenance, and technical support.

Senior Web Developer / Solutions Engineer

Gardens Alive

Jan 2012 – Sep 2022

- Developed and maintained **19+ high-traffic ecommerce and content websites** across a large multi-brand portfolio.
- Built reusable technical solutions and templates supporting scalable deployment across multiple business units/web properties.
- Partnered with merchandising, marketing, and business stakeholders to scope and deliver technical implementations.
- Integrated CRM/email marketing systems including **Silverpop** for campaign automation and personalization.
- Led technical troubleshooting and debugging of production issues impacting customer-facing digital experiences.
- Improved accessibility across portfolio to **95+ benchmark scores**.
- Optimized frontend performance, page load speed, and conversion-critical user journeys.
- Maintained legacy and modern web systems while ensuring stability during business-critical campaigns.

Web Developer

Red Rock Taxes

Jun 2010 – Dec 2011

- Delivered custom web development solutions for multiple clients.
- Managed DNS, hosting, deployments, domain configurations, and infrastructure troubleshooting.

- Consulted directly with clients to gather requirements and implement technical solutions.

Selected Technical Projects

Machine Learning / AI Projects

Deep Learning Repository

ML Repository

- Developed ML models and analytical pipelines using Python, TensorFlow, and Scikit-learn for classification and predictive analysis.

Education

Bachelor's Degree in Computer Applications
