India (Remote)

Software Engineer / Full Stack Developer

Software Engineer with **13.5+ years of experience** building and maintaining production-grade software across frontend and backend systems. Experienced in full-stack web development, scalable platform engineering, accessibility, technical troubleshooting, API integrations, and stakeholder-facing technical delivery. Proven ability to own software lifecycle from design through deployment, debugging, optimization, and long-term maintenance across legacy and modern architectures.

Core Skills

Programming: JavaScript (ES6+), TypeScript, PHP, Node.js, Python, HTML5, CSS3

Frontend: React, Next.js, Responsive UI Development, Accessibility (WCAG), Performance Optimization

Backend: REST APIs, Express.js, Server-side Architecture, API Integrations

Databases: MySQL, PostgreSQL, SQL, Relational Data Modeling

Cloud/Infra: DNS, Hosting, Deployment Pipelines, CI/CD, Linux, Virtualized Environments

Engineering Practices: Debugging, Code Reviews, Technical Documentation, Cross-Team Collaboration

Professional Experience

Marketing Web Developer / Full Stack Engineer

Measured

Oct 2023 – Nov 2024

- Sole engineering owner for company marketing website and web platform infrastructure, responsible for full software lifecycle across frontend, backend integrations, deployment, and maintenance.
- Built and maintained scalable web application features, custom integrations, and internal tooling using JavaScript, APIs, and CMS/backend systems.
- Improved website performance from **3.0s to 0.7s load time** through architectural and frontend optimization.
- Increased lead conversion rate by **25%** through UX optimization, form redesign, and technical experimentation.
- Integrated and maintained multiple third-party APIs/services including analytics, attribution, CRM, and automation tooling.
- Diagnosed and resolved production issues across performance, infrastructure, integrations, and user-facing defects.
- Collaborated directly with cross-functional stakeholders to scope, prioritize, and deliver technical solutions.

Senior Web Developer / Full Stack Engineer

Gardens Alive

Jan 2012 – Sep 2022

- Developed and maintained software powering **19+ production ecommerce/content websites** across a multi-brand digital portfolio.
- Built frontend and backend functionality using PHP, JavaScript, MySQL, HTML, and CSS within large-scale production systems.
- Modernized and extended legacy application codebases while preserving business-critical stability.
- Led accessibility remediation initiatives achieving **95+ accessibility scores** across managed web properties.
- Designed reusable software modules and templates for scalable feature deployment across brands/sites.
- Integrated CRM and marketing automation systems including Silverpop and related data workflows.
- Troubleshoot and resolved complex production defects, performance bottlenecks, and cross-system integration issues.
- Partnered with merchandising, marketing, design, and business teams to deliver software solutions aligned to business requirements.

Web Developer

Red Rock Taxes

Jun 2010 – Dec 2011

- Delivered full-stack development for multiple client web applications and business websites.
- Built responsive user interfaces and backend-driven functionality for custom business requirements.
- Managed deployments, DNS, hosting, infrastructure troubleshooting, and performance optimization.

Selected Projects

Machine Learning / AI Projects

Deep Learning Practice Repository

Traditional ML Repository

- Built practical machine learning and deep learning projects using Python, TensorFlow, and Scikit-learn including classification, feature engineering, CNNs, and model evaluation pipelines.

Modern Full Stack / Frontend Projects

Portfolio

- Developed and deployed modern React/Next.js applications demonstrating component architecture, SSR/SSG, API integrations, and performance optimization.

Education

Bachelor's in Computer Applications
