

Yogita Mittal

Senior Frontend Engineer (React / TypeScript / Web Architecture)

India — Remote Friendly

yogitamittal.tech@gmail.com — +91 8360492810

GitHub — LinkedIn — Portfolio

Summary

Senior Frontend Engineer with 13+ years of experience building scalable, high-availability web applications and consumer-facing digital products. Deep expertise in React, TypeScript, JavaScript (ES6+), frontend architecture, and performance optimization. Proven track record modernizing production web applications, architecting reusable UI systems, and collaborating across backend/product/design teams in API-driven environments. Additional hands-on experience with machine learning workflows and applied AI projects.

Core Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, Responsive Design

State Management: Redux, Context API, Client-side State Patterns

Architecture: Component Systems, Modular Frontend Architecture, API-Driven UIs, Microservice/Service-Oriented Environments

Backend Familiarity: Node.js, Express, MongoDB, REST APIs, RPC-style APIs

Performance / Reliability: Core Web Vitals, High Availability Concepts, Load Optimization, Caching, Lazy Loading

Tooling: Webpack, Vite, Babel, npm/yarn, Docker, CI/CD

AI / ML: TensorFlow, Scikit-learn, Pandas, NumPy, Feature Engineering, Model Evaluation

Quality: Accessibility (WCAG/ARIA), Cross-browser Compatibility, Debugging, Testing Practices

Professional Experience

Marketing Web Developer — Measured

Oct 2023 – Nov 2024

- Owned end-to-end development of high-performance production web experiences from architecture through deployment and iteration.
- Led frontend architecture decisions across reusable component systems and modular content frameworks.
- Reduced site load time from 3.5s to 0.7s through code splitting, asset optimization, rendering improvements, and caching strategies.
- Increased SEO/technical health score from 78% to 98% via semantic HTML, metadata restructuring, and frontend architecture improvements.
- Improved lead conversion by 25% through UI/UX optimization, hierarchy refinement, and iterative experimentation.
- Built responsive, cross-browser compatible React/Next.js interfaces integrated with RESTful backend APIs.
- Collaborated across design, analytics, and backend stakeholders in service-oriented/API-driven environments.

Software Developer — Kinerk Direct Marketing Solutions / Gardens Alive

Jan 2012 – Sept 2022

- Developed and maintained frontend functionality across 19 high-traffic e-commerce websites using JavaScript, HTML, CSS, Smarty PHP templates, and server-rendered component patterns.
- Built dynamic UI modules, reusable page structures, interactive product/category components, and promotional landing experiences for multiple consumer brands.
- Implemented client-side JavaScript enhancements for cart, checkout, product discovery, validation, and dynamic user interactions.
- Led accessibility modernization initiative, raising Lighthouse accessibility scores to 95+ across all managed websites.
- Improved frontend performance, stability, and usability across business-critical revenue-generating platforms.
- Diagnosed and resolved critical production issues in checkout/cart/user flows under high-traffic conditions.

- Integrated frontend systems with backend APIs and third-party services for payment, shipping, and product workflows.

Selected Projects

Red Rock Taxes — Website Migration / Optimization / SEO Preservation

- Led full website migration including DNS transfer, domain configuration, redirects, deployment, and infrastructure cutover.
- Designed and implemented 301 redirect strategy preserving SEO equity and preventing ranking loss.
- Improved accessibility, semantic structure, and frontend performance across rebuilt experience.

Ideaboard — Microservice Architecture Platform

- Built API-driven Node.js/Express platform using modular service-oriented architecture principles.
- Implemented scalable backend workflows with Dockerized local development environment.
- Configured local environments including ports, databases, and service orchestration.

Machine Learning Projects

- Built deep learning and traditional ML projects including image classification, sentiment analysis, and structured-data classification using TensorFlow and Scikit-learn.
- Performed data preprocessing, feature engineering, model training, hyperparameter tuning, and evaluation across multiple ML problem domains.

Education

Bachelor's Degree — Computer Science / Engineering
