PROFESSIONAL SUMMARY

Senior Front-End Engineer with 12+ years of experience building scalable web applications across SaaS and eCommerce domains. Strong expertise in JavaScript, React, and Next.js with focus on reusable component architecture, performance optimization, accessibility (WCAG), and structured UI systems. Currently expanding into AI/ML and data analysis to strengthen measurement-driven product thinking.

CORE COMPETENCIES

- Frontend Development: React, Next.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design
- Architecture & Quality: Component-Based UI Patterns, Reusable Design Systems, Performance Optimization, Accessibility (WCAG/ADA), Cross-Browser Compatibility
- APIs & Data Integration: REST API Integration, Node.js, PostgreSQL, MySQL
- Data & Analytics (Developing): Python (Pandas basics), Exploratory Data Analysis (EDA), Data Visualization (Matplotlib, Seaborn), Google Colab

PROFESSIONAL EXPERIENCE

Freelance Front-End / Full-Stack Developer (Remote) | Nov 2024 – Present

- Red Rock Taxes (Multistate US Tax Firm): Delivered frontend enhancements focused on structured layout, usability, and performance
- Lakshmi Iron Company: Built dynamic category and multi-brand mapping system using Next.js with reusable UI components
- Implemented quick-view product modals, WhatsApp-based CTAs, and integrated Supabase-powered review system
- Developed React and Next.js applications for SaaS and commerce workflows with focus on maintainability

Marketing Developer — Measured (Remote, US) | Oct 2023 – Nov 2024

- Contributed to website enhancements and structured content systems across marketing and product-facing properties
- Built modular frontend components aligned with design specifications
- Improved frontend performance through asset optimization and code refinement

- Supported accessibility improvements aligned with WCAG standards
- Collaborated cross-functionally to translate business requirements into production-ready UI solutions

Software Developer — Gardens Alive!, USA | Jul 2012 – Feb 2022

- Built and maintained multiple high-traffic eCommerce platforms
- Modernized legacy frontend codebases to improve maintainability and structure
- Implemented ADA/WCAG accessibility improvements
- Integrated frontend systems with backend services using REST APIs
- Contributed to frontend best practices and collaborative code reviews

EDUCATION & CERTIFICATIONS

- Bachelor of Computer Applications — Sikkim Manipal University
- Python for Everybody — University of Michigan (Coursera)
- JavaScript Algorithms & Data Structures — freeCodeCamp
- Git & GitHub for Developers — LinkedIn Learning
- Currently pursuing foundational studies in AI/ML and applied data analysis
