Summary

Senior Full-Stack Engineer with **13+ years of experience building and supporting scalable web applications and e-commerce platforms for U.S. businesses**. Strong expertise in **React, Next.js, JavaScript ecosystems, API integrations, and production debugging**.

Experienced in **stabilizing existing architectures, resolving production incidents, and improving system performance** across high-traffic platforms. Comfortable working in **async environments with remote teams**, investigating platform issues, and delivering targeted fixes and refactors.

Core Skills

Frontend : React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5 / CSS3, SASS, LESS

Backend: Node.js, REST APIs, API integrations

Database: PostgreSQL, MySQL

Cloud & DevOps: AWS (S3, basic cloud deployments), Docker (containerized deployments), CI/CD pipelines, Production monitoring and debugging

Other: Git / GitHub, Performance optimization, Log analysis, Async collaboration & ticket-based workflows

FREELANCE & INDEPENDENT PROJECTS

Dynamic Category & Multi-Brand Platform – Lakshmi Iron Company

- Designed scalable category and brand mapping architecture supporting multi-brand product relationships.
 - Implemented reusable UI components and structured product discovery flows.
 - Built dynamic category relationships enabling flexible product grouping and expansion.
-

Red Rock Taxes – Website Optimization, Domain Migration & Integrations

- Managed **domain transfer and DNS configuration updates**, ensuring continuity during platform migration.
- Implemented **custom transactional email workflows using SendGrid**, integrating backend form handling with programmatic email delivery.
- Developed **server-side email triggers and validation logic** for client inquiry and service request flows.

- Integrated **Google reCAPTCHA** to secure public forms and prevent automated spam submissions.
 - Configured redirects and routing rules to preserve SEO value and maintain existing inbound traffic after domain transition.
 - Improved operational workflows through structured service forms and optimized site navigation.
-

Ideaboard – Microservices Architecture

GitHub: <https://github.com/yogitamittal93/ideaboard>

Live: <https://ideaboard-5ma18h8qh-yogitasingla93s-projects.vercel.app/>

- Designed **Node.js + Express API Gateway architecture** connecting modular services.
 - Implemented **Dockerized service architecture** with PostgreSQL data storage.
 - Built scalable backend workflows for idea creation, management, and collaboration features.
-

PROFESSIONAL EXPERIENCE

Marketing Web Developer – Measured

- Reduced site load time from **3.5 seconds to 0.7 seconds** through frontend optimization and performance tuning.
 - Increased SEO health score from **78% to 98%** through structured metadata and content architecture improvements.
 - Integrated marketing and analytics tools including HubSpot, Clearbit, and Google Tag Manager to enhance lead tracking, form enrichment, and increase demo form submissions.
 - Built scalable content systems including Events, FAQs, and Resources sections.
 - Improved lead conversion by **25%** through UX and structured content improvements.
 - Collaborated with marketing, design, and analytics teams to improve performance and engagement.
-

Software Developer – Kinerk Direct Marketing Solutions

(Gardens Alive Portfolio)

- Contributed to frontend and backend redesign for Breck's Gifts and related brands.
 - Integrated third-party APIs improving checkout and order workflows.
 - Performance improvements contributed to **~3× revenue growth across two brands during COVID**.
 - Diagnosed and resolved revenue-impacting cart and checkout issues.
 - Improved legacy PHP-based systems by introducing structured JavaScript components and resolving frontend performance issues across high-traffic e-commerce platforms.
-

Professional Development

AI / Machine Learning Training (Ongoing)

- Practical training in machine learning workflows using Python.
 - Hands-on exposure to data preprocessing, feature engineering, and model evaluation.
 - Working with tools such as Pandas, NumPy, and Scikit-learn for experimentation with structured datasets.
-

Education

Bachelor's Degree – Computer Science / Engineering
