GitHub — LinkedIn — Portfolio

Summary

Senior JavaScript Engineer with 13+ years of experience building high-performance web applications and scalable frontend architectures. Deep expertise in React, modern JavaScript (ES6+), and Core Web Vitals optimization.

Strong track record of shipping production features end-to-end — from frontend interfaces to backend integrations using Node.js APIs. Experienced in improving performance, accessibility, and user experience for high-traffic applications.

Core Skills

Frontend: React, Next.js, JavaScript (ES6+), HTML5, CSS3, SCSS

Backend: Node.js, Express, REST APIs

Performance: Core Web Vitals, Lazy Loading, Code Splitting, Asset Optimization

Architecture: Component Design, API Integration, Modular Systems

Tooling: Webpack, Vite, ESBuild, Git

Testing: Jest (familiar), Debugging, QA workflows

Quality: Accessibility (WCAG, ARIA), Cross-browser Compatibility, Responsive Design

Professional Experience

Marketing Web Developer – Measured

Oct 2023 – Nov 2024

- Built and shipped modern React-based web applications with strong focus on performance and user experience.
- Reduced page load time from 3.5s to 0.7s through code splitting, lazy loading, and optimized rendering strategies.
- Improved Core Web Vitals and SEO score from 78% to 98% via structured data, semantic HTML, and performance tuning.
- Developed reusable component systems for scalable and maintainable frontend architecture.
- Integrated frontend with REST APIs and backend services for dynamic content delivery.
- Worked with modern build tools (Vite/Webpack) to optimize bundling and development workflows.
- Improved accessibility through semantic markup, ARIA roles, and contrast enhancements.
- Ensured cross-browser compatibility and responsive behavior across devices.
- Collaborated with product and design teams for rapid feature iteration and delivery.

Software Developer – Kinerk Direct Marketing Solutions

Jan 2012 – Sept 2022

- Developed and maintained large-scale, high-traffic web applications using JavaScript, PHP (Smarty), and MySQL.
- Built dynamic frontend experiences integrated with backend-driven templating systems.
- Led accessibility improvements across 19 production websites, achieving Lighthouse scores of 95+.
- Improved frontend performance and reliability across multiple consumer-facing platforms.
- Diagnosed and resolved critical production issues affecting user flows and conversions.
- Integrated third-party APIs for analytics, payments, and marketing workflows.
- Ensured consistent UI behavior across browsers and devices.

Projects

Dynamic Category Platform – Lakshmi Iron Company

- Built scalable React-based UI components and structured product browsing experiences.
- Designed modular frontend architecture for extensibility and maintainability.

Red Rock Taxes – Performance Optimization & Migration

- Improved frontend performance and user experience through optimized rendering and navigation.
- Led website migration with SEO-safe 301 redirects and zero downtime deployment.

Ideaboard – Node.js Backend System

- Built backend services using Node.js and Express with modular API architecture.

Engineering Impact

- Strong ownership mindset — consistently delivered end-to-end features across frontend and backend.
- Focused on performance, usability, and clean code practices in production systems.
- Comfortable working in fast-paced, iterative environments with cross-functional teams.

Education

Bachelor's Degree – Computer Science / Engineering
