

★ Yogita Mittal – Web Development Portfolio

Full-Stack Web Developer | 12+ Years Experience

 Building scalable, high-performing, and user-centric web applications with **Next.js, React, PHP, and JavaScript**.

 Proven expertise in **eCommerce, SaaS, and marketing tech platforms** with U.S. and global teams.

◆ Featured Projects

Next.js Dynamic Category & Brand Pages (Freelance Project)

<https://github.com/yogitamittal93/our-company>

<https://www.lakshmiironcompany.in/>

- Designed and developed a **full-stack freelance project** using **Next.js**.
 - Built a **dynamic category & brand system** with subcategories displayed as large, visually appealing image cards.
 - Implemented **multi-brand product mapping** using `brand_url`, enabling one product to be listed under multiple brand pages.
 - Created **quick-view product modals** with clean UI and integrated a **WhatsApp-powered “Get Quote” CTA** for instant customer engagement.
 - Developed a **Supabase-powered review carousel**, supporting responsive layouts, profile photos, and star ratings.
 - Focused on **mobile-first performance and modern UI design**, delivering a seamless and intuitive user experience.
 - Ensured **scalability and maintainability** by building reusable components and clean code architecture.
-

💡 New Featured Project: Ideaboard App (Full-Stack Microservices Project)

 <https://github.com/yogitamittal93/ideaboard>

 <https://ideaboard-5ma18h8qh-yogitasingla93s-projects.vercel.app/>

- Built a full-stack **Ideaboard** and **marketing landing page** using a **Microservices Architecture** with an **API Gateway**, enabling future scalability.
 - Tech stack: **Next.js, Node/Express**, and **PostgreSQL**, fully **Dockerized** via docker-compose for instant local setup and cloud parity.
 - Deployed backend on **Render** and frontend on **Vercel** with optimized routing and database integration.
 - Created a dynamic, multi-colored **“Sticky Note”** interface delivering a real-time brainstorming experience.
 - Comprehensive documentation in README covers architecture, setup, and scaling decisions (final stable commit: ce813a6).
-

Measured (<https://www.measured.com/>) – Marketing Web Developer

- Led most of the site’s redesign, including the homepage and core UX.

- Built and updated the Events, FAQs, and Resources sections with paginated structures.
 - Improved SEO health via structured meta tag enhancements and robots.txt updates.
 - Collaborated with design and content teams to enhance visual consistency and lead conversion.
-

Breck's Gifts (<https://www.brecksgifts.com/>) – Software Developer

- Executed a complete front-end and back-end redesign of the site.
- Developed custom components, templates, and personalized gift journeys.
- Enhanced responsiveness and performance across all devices.

Spring Hill Nursery (<https://www.springhillnursery.com/>) – Web Developer

- Designed high-converting pop-ups integrated with marketing funnels.
- Developed and maintained product detail pages, including backend logic and frontend display.

Gurney's (<https://www.gurneys.com/>) – Software Developer

- Developed dynamic chef-focused pages and seasonal landing pages.
- Resolved complex JavaScript and layout bugs.
- Integrated email validation with BriteVerify for accurate form submissions.

DutchBulbs (<https://www.dutchbulbs.com/>) – Software Developer

- Built and launched abandon cart email flow integration.
- Ensured event-driven tracking compatibility for remarketing strategies.

Bits & Pieces Canada (<https://bitsandpiecescanada.ca/>) – Software Developer

- Created multiple seasonal and promotional landing pages.
- Fixed complex cart calculation and checkout errors.

Breck's (<https://www.brecks.com/>) – Software Developer

- Engineered keycode-based logic for discounts.
- Handled backend data manipulation for regional targeting.

Breck's Bulbs Canada (<https://www.brecksbulbs.ca/>) – Web Developer

- Built and maintained multiple promotional landing pages.
- Implemented mobile-first performance improvements.

Weeks Roses (<https://www.weeksroses.com/>) – Software Developer

- Solely responsible for all ongoing site updates and enhancements.
- Handled cross-team coordination for visual and SEO improvements.

Spilsbury (<https://www.spilsbury.com/>) – Software Developer

- Delivered targeted landing pages and UX features.
- Resolved cart errors affecting mobile and desktop sessions.

Bits and Pieces (<https://www.bitsandpieces.com/>) – Web Developer

- Created and updated promotional pages across multiple campaigns.
 - Fixed cart calculation and checkout issues in high-traffic situations.
-

◆ Python Projects

Spidering & Ranking Project (Capstone – Python for Everybody)

- Developed a **web spider and search ranking system** using Python.
 - Wrote Python scripts to **crawl, parse, and index web pages** into a structured database.
 - Implemented an algorithm to **rank pages by link analysis**, mimicking the fundamentals of search engines.
 - Automated data storage and retrieval using SQLite.
-

◆ Certifications

- **Python for Everybody Specialization** – University of Michigan (Coursera)
 - **JavaScript Algorithms & Data Structures** – freeCodeCamp
 - **Git & GitHub for Developers** – LinkedIn Learning
-

◆ Tools & Platforms

- **CMS:** WordPress, CommerceV3, Kalio, Shopify
 - **Languages & Frameworks:** PHP, JavaScript, HTML/CSS, jQuery, React.js, Node.js, **Next.js**, *Python (basic proficiency)*
 - **Tools:** HubSpot, Clearbit, Google Tag Manager, AWS, SEMRush, Ahrefs, Klaviyo, Silverpop
 - **Workflow:** Git, Bitbucket, Jira, Trello
 - **Proficient in:**
 - A/B testing
 - Converting Figma/Photoshop/Canva wireframes to responsive websites
 - Email marketing
 - Caching, debugging, tracking
 - WCAG compliance
 - SEO-friendly development
-

◆ Summary

With **12+ years of professional experience**, I specialize in **full-stack web development** with deep expertise in **PHP, JavaScript, jQuery, and modern frameworks like Next.js and React**. I have successfully delivered **high-traffic eCommerce sites, marketing funnels, and performance-optimized**

landing pages for U.S.-based clients, as well as **end-to-end freelance projects**.

I also bring strengths in **SEO optimization, A/B testing, analytics, and marketing automation**, integrating tools such as **HubSpot, Clearbit, and SEMrush** to drive measurable business growth.

Recently, I expanded into **Python programming**, completing the **University of Michigan's Python for Everybody Specialization**. My capstone involved building a **web spidering and ranking engine**, giving me practical experience in **API integration, data parsing, data visualization, and ranking algorithms**.

✂ What sets me apart: I don't just code websites—I build **business-driven solutions** that balance **design, technology, and marketing impact**.

✚ Available for **remote roles across time zones**.
