## Senior Full Stack Engineer – AI Applications & Agentic Systems

Senior Full Stack Engineer with **13.5+ years of experience** building scalable production web applications, growth systems, and modern AI-powered workflows across React, Next.js, TypeScript, Node.js, NestJS, PostgreSQL, and cloud-native platforms. Strong product-engineering mindset with proven experience owning end-to-end systems, shipping rapidly, optimizing performance, and solving complex business problems in high-impact environments. Actively building AI-native systems involving LLM workflows, automation pipelines, retrieval systems, and modern agentic engineering patterns.

---

### Core Skills

**Frontend:** React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive UI Architecture

**Backend:** Node.js, NestJS, Express.js, REST APIs, tRPC, Server Actions, Authentication Flows

**AI / LLM Engineering:** OpenAI APIs, Claude, AI Workflow Automation, Prompt Engineering, RAG Concepts, AI Agents, Vector Search Concepts, AI-assisted Development, LLM Integrations

**Databases:** PostgreSQL, MySQL, MongoDB, pgvector Concepts

**Cloud / Infrastructure:** Vercel, CI/CD, Git, Linux, DNS, Hosting, Cloudflare, Deployment Pipelines

**Performance:** Core Web Vitals, Lighthouse Optimization, Lazy Loading, Code Splitting, SSR/SSG, Bundle Optimization

**Architecture:** Component Systems, Scalable Frontend Architecture, API Design, Multi-site Systems, Reusable Platform Engineering

**Tools & Workflow:** Cursor, ChatGPT, Claude, GitHub Copilot, Agile Development, Rapid Prototyping, AI-first Development Workflows

---

### Professional Experience

#### Senior Full Stack Engineer / AI Workflow Developer

Current Projects

2025 – Present

- Building modern AI-powered applications using **Next.js, NestJS, TypeScript, PostgreSQL, and Vercel** with focus on scalable architecture and rapid iteration.
- Developing intelligent workflow systems integrating **LLM APIs, conversational interfaces, AI-assisted automation, and retrieval-based experiences**.
- Designing full-stack architectures involving frontend systems, backend APIs, authentication, deployment pipelines, and scalable state management.
- Implementing production-grade UI systems with focus on **performance, accessibility, maintainability, and fast deployment cycles**.
- Leveraging AI-native engineering workflows using **Cursor, Claude, ChatGPT, and modern agentic coding tools** to accelerate development and prototyping.
- Working on AI agent concepts involving multi-step workflows, business automation, onboarding systems, and intelligent user interaction pipelines.

#### Marketing Web Developer / Full Stack Engineer

Measured

Oct 2023 – Nov 2024

- Sole technical owner responsible for the company's marketing web platform, frontend systems, infrastructure, integrations, and technical execution.
- Improved website performance from approximately **3 seconds to 0.7 seconds load time** through aggressive frontend optimization, script reduction, caching, and asset optimization strategies.
- Increased lead conversion rate by **25%+** through UX optimization, form redesign, conversion-focused frontend engineering, and simplified user flows.

- Built scalable frontend systems and reusable components using modern JavaScript architecture and modular development practices.
- Managed integrations involving analytics, tracking systems, attribution pipelines, CRM systems, and marketing automation tooling.
- Worked extensively with **HubSpot CMS, GTM, GA, automation systems, API integrations, and campaign infrastructure**.
- Led technical troubleshooting, debugging, deployment management, SEO optimization, and production issue resolution.
- Collaborated directly with growth, marketing, and leadership teams to rapidly ship high-impact web initiatives.

## Senior Web Developer / Full Stack Engineer

Gardens Alive

Jan 2012 – Sep 2022

- Developed and maintained **19+ high-traffic ecommerce and content platforms** across a large multi-brand portfolio using JavaScript, PHP, MySQL, HTML, CSS, and scalable frontend/backend systems.
- Worked extensively in large production codebases modernizing legacy systems while preserving operational continuity and platform stability.
- Led accessibility initiatives achieving **95+ accessibility scores** across managed websites through WCAG-compliant frontend engineering improvements.
- Built reusable frontend/backend modules enabling rapid deployment of merchandising systems, campaigns, and business-critical seasonal features.
- Supported customer-facing systems and troubleshooting workflows involving production debugging, issue investigation, support coordination, and operational reliability.
- Implemented and maintained integrations involving **Silverpop CRM, marketing systems, campaign tooling, analytics, and automation workflows**.
- Diagnosed and resolved complex frontend and backend production issues in high-traffic environments with emphasis on scalability and maintainability.
- Collaborated cross-functionally with marketing, merchandising, design, and business teams to deliver scalable technical solutions aligned with revenue goals.

## Web Developer

Red Rock Taxes

Jun 2010 – Dec 2011

- Delivered full-stack development and technical consulting for multiple business websites and web applications.
- Managed hosting, DNS, SSL setup, deployments, infrastructure troubleshooting, and website migrations.
- Performed frontend optimization, SEO preservation, technical audits, and website performance improvements.
- Worked directly with clients to scope technical requirements and deliver business-focused web solutions.

---

## Selected Projects

### AI / Machine Learning Projects

Deep Learning Repository

Machine Learning Repository

- Built practical AI and ML systems involving **TensorFlow, Scikit-learn, CNNs, classification pipelines, sentiment analysis, feature engineering, and model evaluation workflows**.
- Explored AI-assisted automation, intelligent workflows, conversational systems, and modern LLM engineering concepts.
- Developed hands-on understanding of AI product workflows, inference pipelines, experimentation cycles, and practical ML implementation.

### Modern Full Stack Applications

Portfolio

- Built modern full-stack applications using **Next.js, TypeScript, React, Node.js, and scalable frontend architecture patterns**.

- Developed production-grade UI systems with focus on responsiveness, performance optimization, accessibility, and user experience.
- Implemented deployment pipelines, SSR optimization, reusable component systems, and scalable frontend engineering practices.

---

## Education

Bachelor's Degree in Computer Applications
