India (Remote)

Senior Full Stack Engineer

Senior Full Stack Engineer with **13.5+ years of experience** building scalable production web applications, high-performance websites, backend systems, and SEO-focused platforms across React, Next.js, Node.js, TypeScript, PostgreSQL, and cloud infrastructure. Proven experience owning features end-to-end including architecture, development, integrations, deployment, optimization, and production support. Strong expertise in scalable frontend systems, data-driven applications, performance optimization, SEO implementation, and distributed production environments.

Core Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, NestJS, Express.js, REST APIs, Full Stack Development

Databases: PostgreSQL, MySQL, MongoDB, Data Modeling

Infrastructure: AWS, Vercel, Cloudflare, CI/CD, GitHub Actions, Hosting, DNS, Linux

Performance & SEO: Core Web Vitals, Technical SEO, Lighthouse Optimization, SSR/SSG, CDN Optimization, Lazy Loading

Architecture: Scalable Web Systems, API Integrations, Distributed Systems, CMS Integrations, Reusable Component Systems

Tools: Git, Vercel, Chrome DevTools, GTM, GA, HubSpot, Headless CMS Concepts

Professional Experience

Senior Full Stack Engineer

Current Projects

2025 – Present

- Building scalable production applications using **Next.js, React, TypeScript, Node.js, NestJS, PostgreSQL, and Vercel** with focus on performance, maintainability, and rapid deployment.
- Architecting and developing full-stack systems involving frontend applications, backend APIs, authentication, CMS integrations, and deployment workflows.
- Developing SEO-friendly web platforms using **SSR, dynamic rendering, metadata optimization, image optimization, and structured data strategies**.
- Implementing reusable frontend component systems and scalable backend architecture patterns for modern production applications.
- Working extensively with APIs, data flows, integrations, deployment pipelines, and cloud-based infrastructure.
- Managing production optimization including performance tuning, caching strategies, database optimization, and monitoring.

Marketing Web Developer / Full Stack Engineer

Measured

Oct 2023 – Nov 2024

- Sole technical owner responsible for the company's marketing web platform, frontend systems, infrastructure, integrations, SEO implementation, and performance optimization.
- Improved website load time from approximately **3 seconds to 0.7 seconds** through aggressive optimization involving lazy loading, script optimization, asset compression, caching, and frontend refactoring.
- Increased lead conversion rate by **25%+** through UX optimization, frontend improvements, and simplified conversion flows.
- Built scalable and reusable frontend systems using modern JavaScript architecture and component-based engineering practices.
- Managed integrations involving APIs, analytics systems, GTM, CRM platforms, tracking pipelines, and marketing automation tooling.
- Worked extensively on technical SEO implementation, metadata optimization, structured content delivery, and website performance improvements.

- Diagnosed and resolved production issues affecting performance, frontend rendering, integrations, and user experience.
- Managed deployment workflows, infrastructure coordination, third-party integrations, and production troubleshooting.

Senior Web Developer / Full Stack Engineer

Gardens Alive

Jan 2012 – Sep 2022

- Developed and maintained **19+ high-traffic ecommerce and content platforms** across a large multi-brand portfolio using JavaScript, PHP, MySQL, HTML, CSS, and scalable production systems.
- Built reusable frontend/backend modules enabling rapid deployment of campaigns, merchandising systems, and SEO-focused landing pages across multiple websites.
- Worked extensively in large production codebases modernizing frontend systems and optimizing backend functionality while maintaining business continuity.
- Led accessibility initiatives achieving **95+ accessibility scores** across managed websites through WCAG-compliant engineering improvements.
- Optimized website performance, frontend rendering, caching systems, and technical SEO implementations for high-traffic environments.
- Managed integrations involving CRM systems, marketing automation platforms, APIs, analytics tooling, and campaign infrastructure.
- Diagnosed and resolved complex production issues related to frontend systems, backend logic, integrations, and infrastructure.
- Collaborated closely with marketing, merchandising, and business stakeholders to deliver scalable technical solutions supporting revenue-critical initiatives.

Web Developer

Red Rock Taxes

Jun 2010 – Dec 2011

- Delivered full-stack development and technical consulting for multiple business websites and digital platforms.
- Managed deployments, hosting environments, DNS, SSL setup, migrations, and infrastructure troubleshooting.
- Implemented technical SEO improvements, frontend optimization, and website performance enhancements.
- Worked directly with clients to scope requirements and deliver scalable business-focused web solutions.

Selected Projects

Modern Full Stack Applications

Portfolio

- Built modern production-grade applications using **Next.js, React, TypeScript, Node.js, PostgreSQL, and scalable frontend architecture patterns**.
- Developed SEO-friendly platforms with focus on SSR optimization, Core Web Vitals, accessibility, structured content delivery, and high-performance rendering.
- Implemented scalable UI systems, backend APIs, deployment pipelines, and reusable component architecture for modern web applications.

Machine Learning / AI Projects

Deep Learning Repository

Machine Learning Repository

- Built practical ML and AI systems involving TensorFlow, Scikit-learn, classification pipelines, sentiment analysis, and intelligent workflow experimentation.
- Explored AI-assisted automation, modern AI workflows, and scalable engineering approaches for intelligent applications.

Education

Bachelor's Degree in Computer Applications
