India (Remote)

Software Engineer – Frontend / Full Stack (React, Next.js, Node.js, TypeScript)

Software Engineer with **13.5+ years of experience** building scalable, high-performance web applications, learning platforms, ecommerce systems, and modern frontend experiences across React, Next.js, JavaScript, TypeScript, and Node.js ecosystems. Proven track record delivering production-grade features end-to-end, improving performance and accessibility, and collaborating cross-functionally with product, design, analytics, support, and marketing teams in fast-paced environments. Strong ownership mindset with experience debugging complex production systems, optimizing conversion flows, and building reusable frontend architectures.

Core Skills

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, PHP, Smarty PHP

Databases: PostgreSQL, MySQL, MongoDB

Architecture: Component Systems, SSR/SSG, API-Driven UI, Modular Frontend Architecture

Performance: Core Web Vitals, Lighthouse Optimization, Lazy Loading, Code Splitting, Accessibility (WCAG)

AI / ML: TensorFlow, Scikit-learn, Pandas, NumPy, Feature Engineering, Model Evaluation

Tools: Git, GitHub, Docker, Vercel, CI/CD, Google Tag Manager, HubSpot, Clearbit

Other: Debugging, Cross-browser Compatibility, Conversion Optimization, Async Collaboration

Professional Experience

Marketing Web Developer / Frontend Owner

Measured

Oct 2023 – Nov 2024

- Owned end-to-end frontend engineering and production website operations as the **sole website engineering owner** within the marketing team.
- Built and maintained scalable frontend systems using **React, Next.js, JavaScript, TypeScript, HTML, CSS, and API integrations**.
- Improved website performance from approximately **3.5s to 0.7s load time** through aggressive frontend optimization, lazy loading, asset optimization, script reduction, caching, and rendering improvements.
- Increased lead conversion rate by **25%** through UX optimization, improved form architecture, reduced friction in conversion flows, and landing page refinements.
- Improved SEO and technical health score from **78% to 98%** via semantic HTML improvements, metadata restructuring, accessibility fixes, structured content systems, and frontend optimization.
- Built reusable frontend modules, scalable content systems, and responsive UI components to accelerate campaign launches and improve maintainability.
- Integrated and maintained tools including **HubSpot, Clearbit, Google Tag Manager, analytics tracking systems, CRM flows, and marketing automation tools**.
- Worked extensively on debugging customer-facing website issues, resolving production bugs, troubleshooting tracking problems, and improving support workflows.
- Collaborated directly with marketing, analytics, design, and growth teams to rapidly ship high-impact production features.
- Contributed to experimentation, performance monitoring, conversion optimization, and analytics-driven product improvements.

Senior Software Developer / Frontend Engineer Portfolio)

Kinerk Direct Marketing Solutions (Gardens Alive

Jan 2012 – Sep 2022

- Developed and maintained **19+ high-traffic ecommerce and consumer-facing websites** across the Gardens Alive multi-brand portfolio.
- Worked extensively with **JavaScript, HTML, CSS, Smarty PHP, MySQL, frontend templates, reusable UI systems, and backend integrations**.
- Built reusable frontend modules, campaign systems, product discovery flows, merchandising experiences, and interactive customer-facing functionality.

- Led accessibility modernization initiative across the portfolio, improving websites to **95+ Lighthouse accessibility scores** through semantic HTML, ARIA improvements, UI consistency, and WCAG compliance.
- Improved frontend performance, stability, and maintainability across large-scale production systems serving high customer traffic volumes.
- Diagnosed and resolved complex production issues affecting checkout flows, customer journeys, order processing, cart systems, and conversion funnels.
- Integrated and maintained third-party services and APIs supporting ecommerce workflows, payment flows, shipping systems, CRM systems, and marketing operations.
- Worked closely with merchandising, customer support, marketing, analytics, and design teams to deliver scalable technical solutions.
- Performance and UX improvements contributed to approximately **3× revenue growth** across two major brands during high-growth COVID periods.
- Integrated and maintained **Silverpop CRM/email marketing systems** supporting large-scale marketing automation and customer engagement workflows.

Career Counselor & Marketing Executive

Pioneer Mathematics

Approx. 9 Months

- Guided prospective students regarding educational programs, online learning packages, and enrollment processes.
- Managed customer communication workflows and marketing outreach initiatives.
- Created and sent marketing emails and promotional communication campaigns to support student acquisition efforts.
- Coordinated with internal teams to improve customer engagement and conversion processes.

Projects

Frontend focused Projects

- Built and deployed modern frontend applications using **React, Next.js, TypeScript, Node.js, and API-driven architectures**.
- Worked on scalable UI systems, modular frontend architecture, responsive interfaces, and production-grade component systems.
- Focused on accessibility, frontend performance optimization, scalable design systems, and modern user experiences.

MOMDigital Platform (Ongoing)

- Currently developing a modern web platform using **Next.js, NestJS, TypeScript, PostgreSQL, and scalable API architecture**.
- Building modular frontend systems, reusable backend services, and scalable full-stack workflows.
- Working on authentication flows, structured APIs, dynamic UI systems, and production-ready architecture patterns.

Lakshmi Iron Company – Dynamic Multi-Brand Platform

- Designed scalable category and brand architecture supporting dynamic product relationships and structured product discovery flows.
- Built reusable frontend components and modular UI systems focused on scalability and maintainability.
- Implemented modern frontend patterns using React and Next.js concepts for improved usability and performance.

Red Rock Taxes – Website Optimization, Migration & SEO Preservation

- Led complete website migration including DNS configuration, redirects, hosting transitions, deployment, and SEO preservation strategy.
- Designed and implemented structured **301 redirect architecture** preventing ranking and traffic loss during migration.

- Improved frontend performance, accessibility, navigation structure, and user experience across rebuilt systems.

AI / Machine Learning Projects

Deep Learning Repository

Traditional Machine Learning Repository

- Built practical machine learning projects involving **TensorFlow, Scikit-learn, CNNs, sentiment analysis, structured data classification, feature engineering, and model evaluation.**
- Exploring AI-assisted workflows, LLM integrations, and intelligent automation systems relevant to modern learning and support platforms.
- Experience understanding technical AI workflows and collaborating across frontend, backend, and AI-oriented development environments.

Education

Bachelor's Degree in Computer Applications
